Florence: Integration

For companies with robust Data Science Teams. Work with TruQua's Experts to Seamlessly Integrate Machine Learning into Core Business Systems

Streamlined

Easily deploy Machine Learning applications on existing systems - ECC, BW, HANA, Cloud Solutions, and more

Integrated

Simplified deployment process encourages constant collaboration and feedback between data scientists and business analysts, facilitating the rapid iterative development necessary for ML

Rapid

Florence is designed to integrate seamlessly with your existing systems and processes. Harnessing the power of Machine Learning without disrupting landscape or process.

The Challenge

Even after identifying a specific business process and creating a tailored machine learning model to that opportunity, companies face huge logistical challenges to utilize that model. In addition to the technical hurdles, there are significant change management impacts that must be addressed. Florence significantly streamlines the deployment and integration of the model so that the business can reap the benefits of Machine Learning immediately, without disrupting key processes.

The Solution

TruQua's offering helps customers implement their Machine Learning model in a matter of 2 weeks.

Utilizing Florence by TruLabs, customers can now take advantage of a simplified deployment process that encourages constant collaboration and feedback between data scientists and business analysts enabling more rapid and iterative model development. Florence takes ML beyond limited analysis on past data and incorporates ML directly into core business processes

The Process

- Implementation-ready models are deployed into Florence to integrate with business data from source systems
- Florence automatically provisions the Machine Learning server and generates the necessary connection points. Florence provides pre-generated code snippets to connect to your model via ABAP, HANAXS and Fiori

Contact TruQua Today to Take the First Step

Work with TruQua's team of data scientists to create and deploy Machine Learning models that are custom to your business and integrated with existing business systems. A full license for Florence will be provided, free of charge, during the project phases and extending two weeks past the engagement for initial customer testing. Project phases for a Florence deployment include:

Week 1: System setup, Model Load into Florence and Integration

Week 2: Integration Testing and Validation
